FLY LORDS

WILL TAYLOR

WELDED LOOPS

Welded loops make rigging fast, easy and reliable. Cortland loops are strong, secure and durable.

HIGH FLOATING DYNA-TIP

Dyna-Tip technology reduces the density of fly line tips. Resulting in higher tip and leader flotation while improving line management.

TUNGSTEN TIP TECHNOLOGY

Premium Tungsten material combined with unique tapers for fast sinking presentations.

SHOOTING TECHNOLOGY

ST coating delivers a reduced-friction performance with a glass-smooth finish and remains a key element in line slickness over its life span.

COLD SALT TECHNOLOGY

A supple yet extremely durable saltwater coating allowing for a memory free line in cold conditions.

POLYETHYLENE

Liquid Crystal lines are built with a blend of Polyethylene compounds (PE) over a monofilament core resulting in the toughest, slickest-shooting, floating fly lines.

HANG MARKERS

Hang Technology is a highly visible color transition identifying when it's time to fish the "hang" during a retrieve.

FIFTY+ CORE

Built for the most demanding species. Core strength of more than 50lbs allows anglers to put maximum drag and pressure on a fish without compromising the taper design or line density.

TROPIC PLUS

The perfect blend of advanced polymers to achieve a hard, durable surface that remains slick in extreme heat.

TOP SECRET

Top Secret is a highly abrasion resistant, supple material allowing for superior knot strength while remaining virtually clear under water.

GRIP SET

Designed to give the angler a better hook set when targeting large game fish or fish with hard mouths.

X-STRONG CORE

Constructed with a tight weave and high pick count for extreme durability and maximum applied pressure.

WARM TEMPERATURE

Ideal use in 50 - 70 degree (F) temperatures

HEAT-TEMPERED SURFACE TREATMENT

A process that incorporates extreme slickness additives. Seals out dirt and oils while maintaining an exceptionally low friction coefficient.

COLD TEMPERATURE

Ideal use in 30 - 50 degree (F) temperatures

TROPICAL TEMPERATURE

Ideal use in 70 + degree (F) temperatures

EURO NYMPH SERIES

DEVELOPED TO EXCEL IN ALL EURO AND MODERN NYMPHING TECHNIQUES

Our Euro Nymph lines are built with a strong, sensitive core enabling superior strike detection while reducing line sag between guides. Featuring a slick coating in a variety of tapers, sizes and colors.

NEW PRODUCT

EURO NYMPH BRAID CORE

FLOATING

FRESHWATER

LINE LENGTH: 90ft

The Euro Nymph Braid Core fly lines are ideal for all euro and modern nymphing tactics. Each taper profile can be used for a variety of techniques and is the lightest offering within the Euro Nymph Series. The most popular choice amongst anglers.

TROUT SERIES

FOR VERSATILE ANGLERS WHO TARGET TROUT IN EVERY SEASON

Trout Series fly lines feature complex taper designs that deliver shoot-ability, versatility and consistency for every trout situation. Each Trout Series line features our signature Shooting Technology coating that prolongs the life of your line and reduces friction within your guides. Specialized braided nylon multifilament cores remain supple and tangle free in the coldest trout waters.

ULTRALIGHT

FLOATING

FRESHWATER

LINE LENGTH: 80ft / 90ft

The Ultralight line features a long front taper for very delicate presentations and precise loop control. The thin overall diameter decreases water surface disturbance for smart, pressured fish. An ideal choice for dry fly anglers.

- Extremely Fine Front Taper
- Thinner Overall Diameter
- Delicate Presentations

AQUA GREEN / DARK GREEN / PALE YELLOW

COMPETITION SERIES

**SPECIFICALLY DESIGNED TO MEET
THE DEMANDS OF THE BEST
ANGLERS AROUND THE WORLD**

Cortland has developed an entire range of products dedicated to the best anglers who demand the highest level of performance on rivers and lakes. A complete offering of lake/reservoir lines has been finely tuned to complement any tactic you need to employ. From extreme distance in the FO-Tech lines to density compensated sinking lines with hang markers, we know you'll be better suited the next time you hit the water.

FO-TECH FLOAT

FLOATING

FRESHWATER

LINE LENGTH: 130ft

Ideal for fishing from a boat or bank angling when floating lines are needed. Head and running line color change ensures line control and promotes better shoot-ability.

- Extreme Distance
- Quick Loading
- High Floating

WHITE / YELLOW

CORE: BRAIDED NYLON MULTIFILAMENT

SIZE WF	5 / 6	6 / 7	7 / 8
GRAIN WEIGHT	195	225	255

FO-TECH INTERMEDIATE

INTERMEDIATE / FLOATING

FRESHWATER

LINE LENGTH: 130ft

Built with an aggressive taper to load rods quickly in a boat or when angling from a bank. Perfect sink rate for fishing flies just under the surface at far distances.

- Extreme Distance
- Sink Rate 2-3 IPS
- Floating Running Line

SMOKE / YELLOW

CORE: BRAIDED NYLON MULTIFILAMENT

TROPIC PLUS SERIES

DESIGNED TO DELIVER THE BEST PERFORMANCE IN TROPIC CONDITIONS

Tropic Plus Series fly lines are treated with specially formulated primers for optimum adhesion and stiffness. The hard, durable surface coating allows these lines to shoot well and stay both stiff and slick in the hottest tropical conditions. Highly abrasion resistant, with unique taper profiles for each fly fishing application.

TROPIC PLUS SERIES
NEW PRODUCT
TARPON

FLOATING

SALTWATER

LINE LENGTH: 100ft

The Tropic Plus Series Tarpon features our slick-hard Tropic Plus coating paired with a strong monofilament core that resists tangling and withstands blistering heat. The elongated rear taper and short front taper are ideal for quick changes in line direction and positive turn over.

- High Floating
- Slick Hard Finish
- Dual Welded Loops

 AQUA GREEN / SAND

COLD SALT SERIES

YOUR NEW FAVORITE WINTER JACKET

Designed to handle the abuse of saltwater yet supple enough to deliver flies in the coldest conditions.

REDFISH

FLOATING

SALTWATER

LINE LENGTH: 100ft

Cold Salt Redfish line is built using a braided nylon multifilament core to remain supple in cold conditions. The short aggressive taper design is ideal for presenting large or weighted fly patterns with minimal effort.

- Short Aggressive Taper
- Supple Coating
- Quick Loading

 AQUA GREEN / SKYBLUE

CORE: BRAIDED NYLON MULTIFILAMENT

SIZE WF	6	7	8	9	10
GRAIN WEIGHT	170	200	225	260	305

LIQUID CRYSTAL SERIES

PROVEN AND DESIRED BY THE HARDCORE SALTWATER ANGLERS

Liquid Crystal Series fly lines are virtually invisible in the water as they are made by extruding a proprietary blend of clear polyethylene and advanced copolymers over a monofilament core. The hard PE+ coating has a super-smooth finish with an exceptionally low coefficient of friction so it shoots faster and farther. The coating is permanently fused to the monofilament core so there is no line stretch – for unequalled strike detection and instantaneous hooksets.

GUIDE

FLOATING

SALTWATER

LINE LENGTH: 100ft

The Liquid Crystal Series Guide taper is our slickest, most versatile tropic floating line for extreme heat. A half line size heavy, this taper matches modern action rods perfectly to deliver short and long range casts. An extended back taper allows for fast line pick up for when the fish are on the move.

- Minimal Line Stretch
- Extra Hard Finish
- Aggressive Taper
- Highly visible seafoam green

SEAFOAM

GRAIN WEIGHT	280	330	380	450

CLASSIC SERIES

TRIED AND TRUE, THESE LINES ARE BUILT TO LAST

In 1915 Cortland Line began manufacturing the first “tapered” fly lines. Then in 1953 Cortland introduced the 333 fly line series, and in 1962 the 444 series. Our fly lines are still manufactured and hand inspected in Cortland, New York with the latest advancements in fly line technology. Styled after our fly line boxes of the 1920’s-30’s, the Classic Series pays respect to our history.

444 PEACH

444 FLY LINE

FLOATING

FRESHWATER

LINE LENGTH: 90ft

One of the all-time classics, our Peach line has set a standard for durability and all-around performance for over 50 years. Great for dry fly fishing, nymphing and throwing small streamers. This line is offered in a Weight Forward or Double Taper.

- Easy Casting
- Ultra Supple
- High Floating

PEACH

GRAIN WEIGHT	80	100	120	140	160	185	210

444 SL

444 FLY LINE

FLOATING

FRESHWATER

LINE LENGTH: 105ft

Cortland's SL (specialized line) has remained a staple versatile trout line for over 40 years. The mint green color is highly visible and effortlessly casts a variety of trout rigs. Designed for those anglers that require accurate distance casting.

 MINT GREEN

CORE: BRAIDED NYLON MULTIFILAMENT

SIZE WF	3	4	5	6	7	8	9
GRAIN WEIGHT	100	120	140	160	185	210	240

MODERN TROUT

444 FLY LINE

FLOATING

FRESHWATER

LINE LENGTH: 90ft

The Modern Trout was designed for complete trout versatility. The short front taper will turn over nymph rigs, streamers and dry flies, while the extended back taper increases line control and makes for quick line pick up. Available in two colors.

 MOSS GREEN  ORANGE

CORE: BRAIDED NYLON MULTIFILAMENT

SIZE WF	3	4	5	6
GRAIN WEIGHT	110	130	150	170

TROPIC ALL PURPOSE

444 FLY LINE

FLOATING

FRESHWATER / SALTWATER

LINE LENGTH: 90ft

Cortland's 444 Tropic All Purpose was designed to remain slick in the blistering heat with a hard monofilament core and extra durable finish. A short, aggressive taper will power your flies through heavy winds.

 SAND

CORE: MONOFILAMENT

SIZE WF	5	6	7	8	9	10	11	12

ULTRA PREMIUM FLUOROCARBON TIPPET

With extensive research, development and field testing, we are proud to announce the most premium Fluorocarbon Tippet offering on the market. This tippet is formulated with a “Top Secret” blend giving it the perfect balance of knot strength, suppleness and abrasion resistance.

LENGTHS: 30yd | 100yd

SIZE	03X	02X	01X	0X	1X	2X	3X	4X	5X	6X	7X	8X
BREAK STRENGTH	24.7lb	19.6lb	17.3lb	15.9lb	12.9lb	10.9lb	9.6lb	8.4lb	5.7lb	3.9lb	2.9lb	1.9lb

FLUOROCARBON

TIPPET

Fluorocarbon tippet provides high strength and abrasion resistance, low underwater visibility and excellent knot strength for fishing in situations where extreme stealth is required.

LENGTHS: 30yd

SIZE	0X	1X	2X	3X	4X	5X	6X	7X
BREAK STRENGTH	12lb	10lb	9lb	7lb	5.5lb	4.5lb	3.1lb	2lb

NYLON

TIPPET

Copolymer Nylon Tippet is super-strong and highly abrasion resistant. The high tensile strength, controlled stretch and smooth finish are a perfect combination, providing more suppleness with outstanding knot strength.

LENGTHS: 50yd | 100yd

SIZE	0X	1X	2X	3X	4X	5X	6X	7X
BREAK STRENGTH	18.8lb	15.5lb	12.9lb	9.8lb	8.4lb	6lb	4.2lb	2.8lb

SUPER SUPPLE

NYLON TIPPET

Cortland's Super Supple Nylon tippet is the ideal material for delicate presentations and small flies. The supple nylon material provides superior knot strength and a controlled stretch for ultimate forgiveness when fighting big fish.

LENGTHS: 30yd

SIZE	3X	4X	5X	6X	7X
BREAK STRENGTH	8.8lb	7.2lb	4.8lb	3.7lb	2.6lb

FLUOROCARBON

TAPERED LEADER

Fluorocarbon Leaders are built to be virtually invisible under water and have incredible knot strength. Elongated taper design allows for more positive turnover and less wind knots.

LENGTHS: 9ft

NEW PRODUCT

SINK TIP

TYPE 3 / 6 SINK TIP EXTENSION

PVC coated level sink tips are built with a strong braided nylon multifilament core and dual loops for easy fly line and leader connections. Pair your sink tip on either a single hand or two handed floating line to get flies down in fast or deeper water.

IPS = INCHES PER SECOND

SINK RATE	TYPE 3 3-4IPS	TYPE 6 6-7IPS	TYPE 3 3-4IPS	TYPE 6 6-7IPS

FLY LINE CLEANER PADS - 5PK

LUBRICATED PADS

The pre-soaked pads allow anglers to clean and dress their line in one application. Perfectly sized for the wade angler.

FLY LINE CLEANER

LUBRICANT & PADS

Cortland's Fly Line Cleaner is offered in a 2oz bottle with dry pads, which is ideal for guides, captains and anglers looking to clean a lot of lines. The best silicone-based cleaning and dressing material available.

NEW PRODUCT

GUIDE SERIES COMBO OUTFIT

PERFORMANCE FLY FISHING OUTFITS

Cortland's Guide Series Combo Outfits were designed for maximum performance at an affordable price. Each size outfit gives anglers the ability to fish for a range of species and locations from high-mountain brook trout streams to steelhead rivers. Built using quality components and tested for long-term abuse.

CROWN REEL

PERFORMANCE FLY REELS

Cortland's Crown series mid-arbor disc drag fly reel is machined from aircraft grade aluminum and hard anodized for corrosion resistance. The Crown Series fly reels incorporate a light-weight design while providing structural strength and durability. The center disc drag features a wide range of adjustment with low start up inertia for increased line protection. The counter weighted mid-arbor spool allows for increased line capacity and incorporates a locking knob for a tight tolerance. Easy change left/right retrieve. Available in two sizes from 3WT - 7WT. Cortland branded neoprene reel bag included.

- Machined and Anodized
- Aircraft Grade Aluminum
- Center Disc Drag
- Mid Arbor Spool Design
- Over-sized Drag Knob

NYMPH

PERFORMANCE FLY RODS

Cortland's Nymph series fly rods were specifically designed for modern nymphing techniques. Built on a super light graphite blank which dampens and recovers quickly for exceptional feel. The low reflective, matte black finish allows for an extremely stealthy approach while providing an additional layer of protection. The down-locking reel seat combined with the composite fighting butt allows for exceptional balance and fast hook sets. Nymph Series fly rods feature over-sized light wire single foot guides for easier passage of fly line, monofilament and knots. All ferrules and guides are coated with highly durable epoxy, resisting cracks, flex stress and excessive knots. Finished with alignment dots, size specific rod bags and a protective cordura rod tube.

NYMPH SPECS

MKII NYMPH

PERFORMANCE FLY RODS

Stronger. Lighter. Faster. MKII Nymph Rods are perfect for Nymphing. Balanced weight and the main power in the butt section paired with a downward locking reel seat assists with proper technique. Ergonomic fighting butt provides correct weight distribution and necessary control. Durable, lightweight carbon fiber blank allows you to feel strike detection. Unique guide design allows knots to transition cleanly and assists in line control. The tip section is designed to be extremely light, yet soft enough to protect the finest tippet and not bounce fish.
